

**LINX LAYOUT** — Here is the final designers layout on the \$400,000 Pierre Country Club golf course currently under construction at Mishicot by Baugniet Enterprises Inc., a recreational organization. Its 18 holes will be large enough for championship play and its designers say that even the National Open could be played here. It will be the largest course in Wisconsin. The course is located

on the southwest edge of Mishicot across County Trunk B and will be bisected by clubhouse and supper club will be erected designed the course. It will be ready for

### Dream to Become Reality

# New \$400,000 Golf Course Is Big Enough for National Open

MISHICOT — A dream that began in 1955 will soon become a \$400,000 reality as this village adds to its attractions one of the finest 18 hole golf courses in the middle west.

Carefully laid out over 155 acres of former farmland, it will be large enough for the playing of such an important event as the National Open with tees and greens of sufficient size to accommodate with regular and

has been a pro for 14 years playing in Class A of PGA and for two years was on a playing tour. He was also a former greenskeeper superintendent for the Iowa Greenskeepers Assn.

#### Three Farms Joined

His crew of eight men, seven mobile machines and various smaller units moved in and things have been humming ever since. Three farms were joined with Baugniet's land and consequently

down and bogs filled and at least one whole hill was moved over to a new location by self-loading scrapers which scrape up, pulverize and load nine yards of ground in 30 seconds.

Operators drive the machines at good speed to the dumping location where the ground is pulverized again while being ejected. The round trip varies from a minute and a half to three minutes per average load. When ground moving and rolling is completed

approximately four to five times as big as older courses.

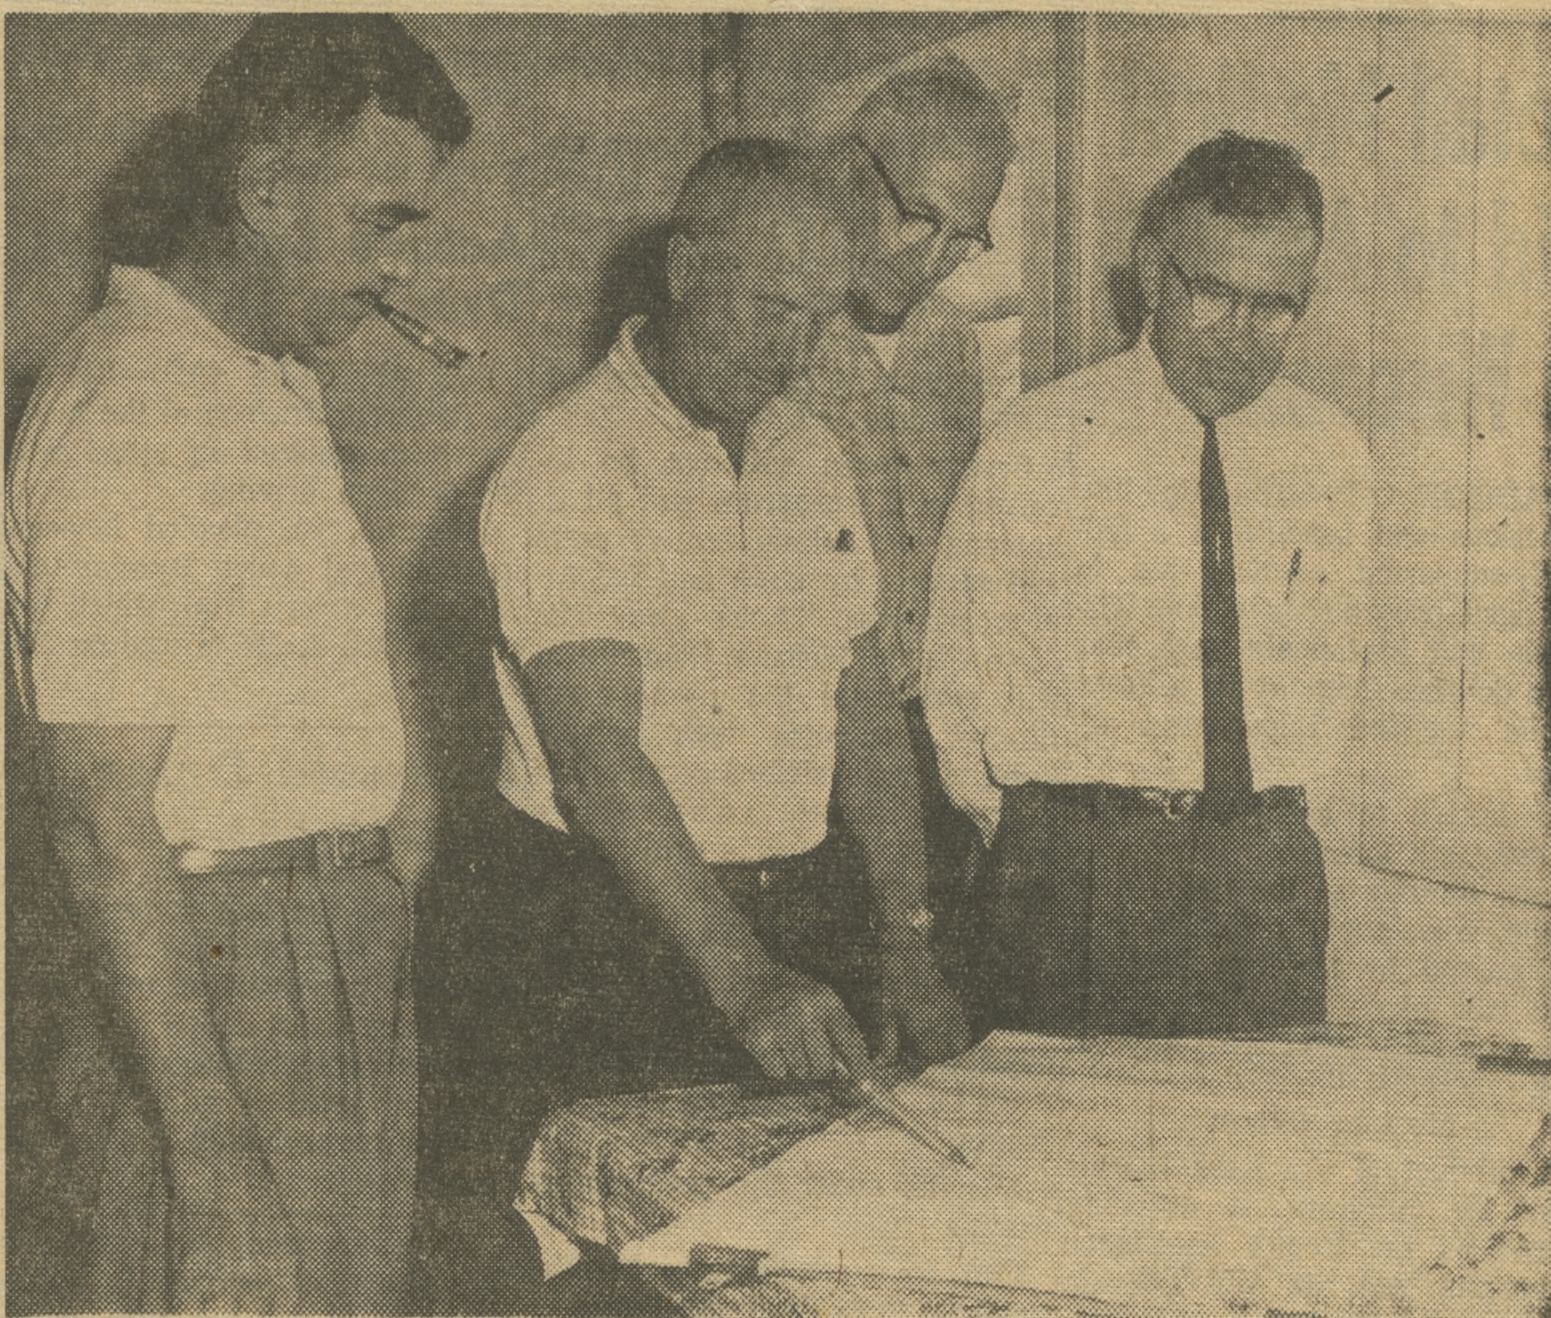

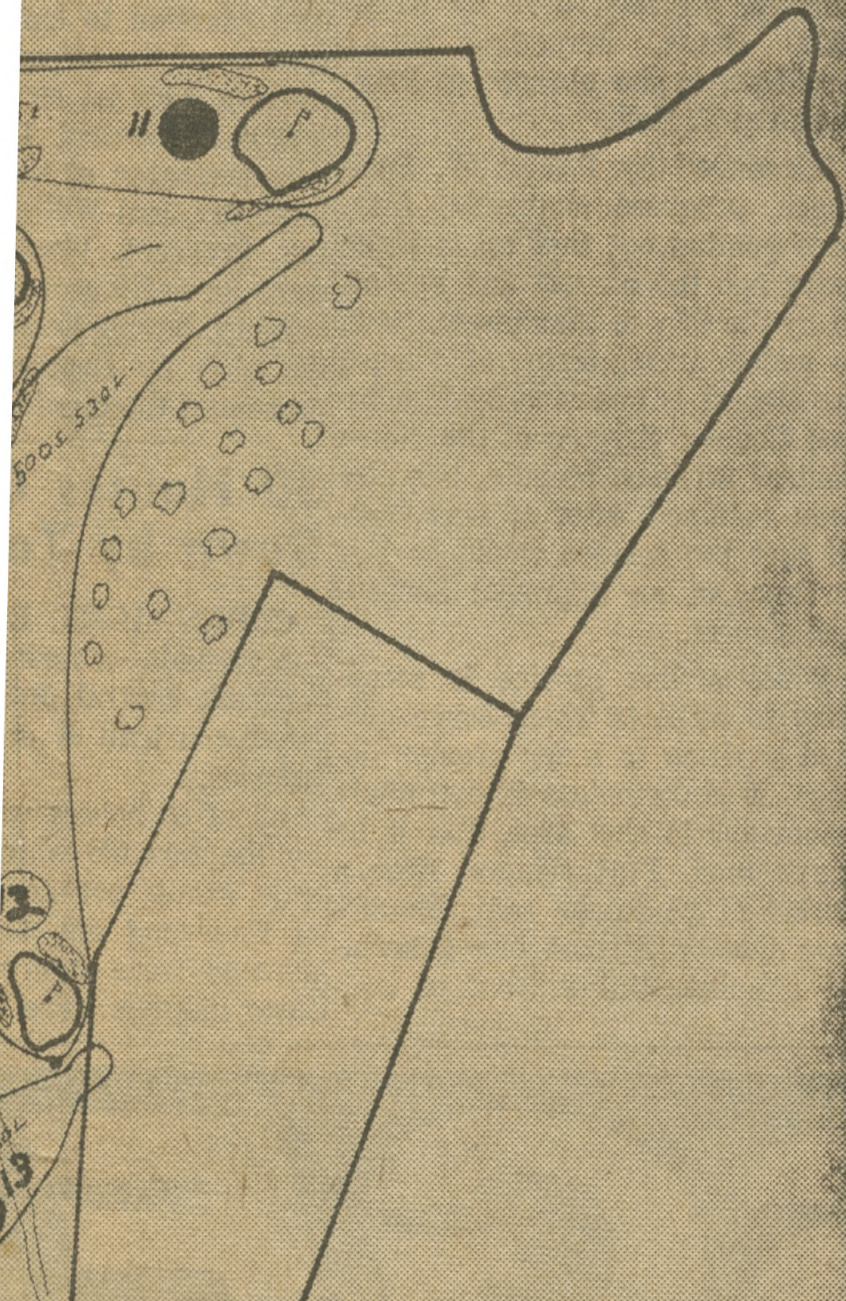

#### Lake Built

A lake has been built on the course which not only will serve as a water hazard on three holes but which will be seven to 11 feet deep, contain 200,000 square feet of water averaging about a million and a half gallons of water for sprinkling purposes. Its runoff, from running springs, furnishes water to a small stream which breaks up into a series of smaller hazards over a half mile of the course. When the springs do not produce enough water the lake will be pumped full from a specially drilled well on the nearby driving range.

Greens and tees have the latest perimeter type watering system with five sprinkler heads around each green. The average

tees on the driving range will be available on the course to be Sept. 20 except next season. About 10 men will be employed at the clubhouse and supper club, seven and eight on the

Dick McAuliffe, a local shortstop, hit the homer of his major league career May 10 against the St. Louis Cardinals.

**SHOULDERS BEHIND WHEEL** — Here is the small group of men masterminding the new golf course. From left, Florenz Baugniet, president of Baugniet Enterprises Inc., and who has never swung a golf club in his life; E. G. Lockie, professional course designer of Davenport, Iowa; Alden Kummerow of Two Rivers who is vice president and general manager; and Fred Baugniet Jr., secretary and treasurer discuss the final draft of the layout as the big earth-moving machines began work.

## Singer Eartha Kitt Files for Divorce

MELBOURNE, Australia (AP) — Singer Eartha Kitt said, there is "nothing vicious or unpleasant" in her divorce suit.

The 35-year-old Negro seeks a divorce from William McDonald, a white real estate agent, in a suit filed at Santa Monica, Calif. She charged extreme cruelty but gave no details.

The couple, married in 1960, have a 21-month-old daughter. Their marriage was the first for both.

**BEGIN CLUBHOUSE**—An unusual design will mark the clubhouse, form of which is indicated by the way the "cats" are cutting down into the heavy clay for the foundation of the clubhouse and dining room which will seat about

450 and have parking space for 350 cars. Diners will sit in front of huge picture windows where they can see all over the course and watch play.

**Kellnersville**

**LAKE**—This lake averages about 11 feet deep. It is man-made and is filled by springs bubbling in the ground. It is expected to be used as a hazard on four holes of the golf course. It will supply water needed to keep the course sprinkled and also supplying water for a half mile creek coursing

through the layout. The lake will hold about 1½ million gallons when filled. Additional water will be pumped to the lake from a specially drilled well nearby. Greens and tees will have latest type perimeter watering systems with five sprinkler heads per green.

**ENTIRE HILL** — Modern machinery can do the job and when the master plan called for a change in the north nine holes and particularly along the end of the course, machines were put to work pulverizing and moving the ground. One large mound of earth was actually moved from one part of the course to

another and this view shows the new course from the top of the moved hill. The tee sends the ball over the valley, across the small water hazards created by the creek below. The creek is part of the half mile water hazard created by runoff of the spring-fed man-made lake. (All photos by staff photographer)

## For Western Discussed

Plans for a western riding club are being discussed at the regular meeting of the Brillion Silver Riding Club this week. The club will be in September at the Park pavilion and will have members of all riding levels in the area. Jerry Morgan, Orlo Koerth and

Harold Wenzel of Brillion are in charge of the event. Chairmen in charge of special projects for the dance include refreshments, Eric Enneper; decorations, Mrs. Jerry Boettcher; admission, Reeve Winkler and advertising Allan Kallies. Admission for the dance will be granted by showing a membership card in a riding club. The newly organized club now has a membership of 93. New members include Mary Dvorak,

Carol Richter, Donald Holtz, Rueben Fischer, Judy Fischer, Barbara Fischer, John Krueger, Pat Orth, Tony Enneper, Rick Rauntree, Orlo, Faith, Deborah and Gary Koerth, Faye Zander, Pat Hepler, Reeve Winkler Jr., Allan Tamm, Dave LeMieux, Gus Janssen, Jim LeFave, Jerry Morgan, Pat McQuillin, Larry Tenor, John Tauscher, Donald Zahn, Ronald Richter, Merlin, Vivien, Sandy, Keith, Elaine, Denise and Kevin

Winkler, Margaret Miller, Jean Pritzl, Sandy Seefeldt, Mike Marek, Elliot Maile, Mary Winkler, Donna Martin, Shirley Hammen and Linda DeCoster.

Most important fruit in the temperate zone is the apple; in the subtropical and tropical zones, it is the orange.

The Speedwell was the sister ship of the historic Mayflower.

## JOHN PAUL BONDE

**KELLNERSVILLE** — The infant son of Mr. and Mrs. Ralph Bonde of Shawano was baptized John Paul by the Rt. Rev. Msgr. Joseph Kalisek at St. Joseph Church Sunday. The baby was born July 27 at Shawano Hospital. Mr. and Mrs. Edwin Fogeltanz of Rt. 2, Cato and Mr. and Mrs. Nick Bonde of Manitowoc are the grandparents. The child's mother is the former Carol Fogeltanz.

Recent visitors at the Edwin Fogeltanz home were Mrs. Mildred Shimek, Paul Bonde, Mr. and Mrs. Floyd Shimek and children, Mr. and Mrs. Vernon Bonde and children, Albert Wilhelm and granddaughter, Miss Clair Danitz of Aniwa, Wis., Mr. and Mrs. Joseph Krummel and family and Mrs. Mary Serwe.

## SCHOOL TO REOPEN

**KELLNERSVILLE** — St. Joseph Parochial School will reopen Tuesday with dismissal at 11 a.m. Sister M. Janice will again serve as principal and teach the seventh and eighth grades. Sister M. Bridgetine will teach the sixth and seventh grades. Sister M. Jonathan will be the fourth and fifth grade teacher. Mrs. Norbert Duckett is the lay teacher in charge of grades 3 and 4. The first and second grades will be introduced by Sister M. Cosmas.

## HOMEMAKERS BANQUET

**KELLNERSVILLE** — The Thrifty Homemakers had their annual banquet at Kubsch Hall Sunday. A social hour followed after dinner with card games.

**KELLNERSVILLE**—After visiting with friends at McBain, Mich. Mr. and Mrs. Richard Steeber and children motored to Mackinac Bridge at St. Ignace, Mich. They also visited the Dan Kolodz family at Superior.

Mr. and Mrs. Wencil Kallies spent a week visiting Mr. and Mrs. Louis Chizek of Boulder Junction and Mr. and Mrs. William Kallies at Land O'Lakes.

Mrs. Helen Olson and c. Jenann, Ronald and Gary Manistee, Mich., visited last week with Mr. and Mrs. Fred Kubsch and Mr. and Mrs. Nick Kubsch.

## Pay Claims Drop

**MADISON (AP)** — Job claims in Wisconsin totaled 32,564 last week, a drop of 1,100 from the week before, the State Industrial Commission reported today. The current figure is below the 32,564 claims reported in the comparable week of last year.

Chicago's Iroquois Theater of 1903 took a toll of 602 most victims being tramp deaths.

In the center of the grounds, alongside County Trunk V which runs between front and back nine holes, will be a clubhouse capable of seating and serving 450 persons with parking spaces for 350 cars and from whose spacious windows the entire course will be visible. The dining room and bar will be on the main floor and lockers, showers, and a pro shop in the basement.

#### Never Swung Club

Plans finally jellied in 1962 and in June, 1963, Baugniet Enterprises Inc., was formed for recreational purposes. Florenz Baugniet, on whose farm the major part of the course is laid out, was elected president. He has never swung a golf club on a golf course. Alden Kummerow of Two Rivers is vice president and general manager and Fred Baugniet Jr., Rt. 2, Two Rivers, is secretary - treasurer. The name selected for the new course, which will be open to the public, will be "The Pierre Country Club." E. G. Lockie of Davenport, Iowa, was selected to lay out and build the course.

Lockie, a pro golfer turned designer, has built 17 courses, mostly in the Chicago area. A former farmer, he moved to the city and became interested in golf in 1936. He operated a driving range for golfers for several years and finally built a course for himself. Other golfers liked his ideas for improving courses and asked him to design and build for them. He

was purchased from Harry Joas, Hugo Ploeckelman and Loretta Rice.

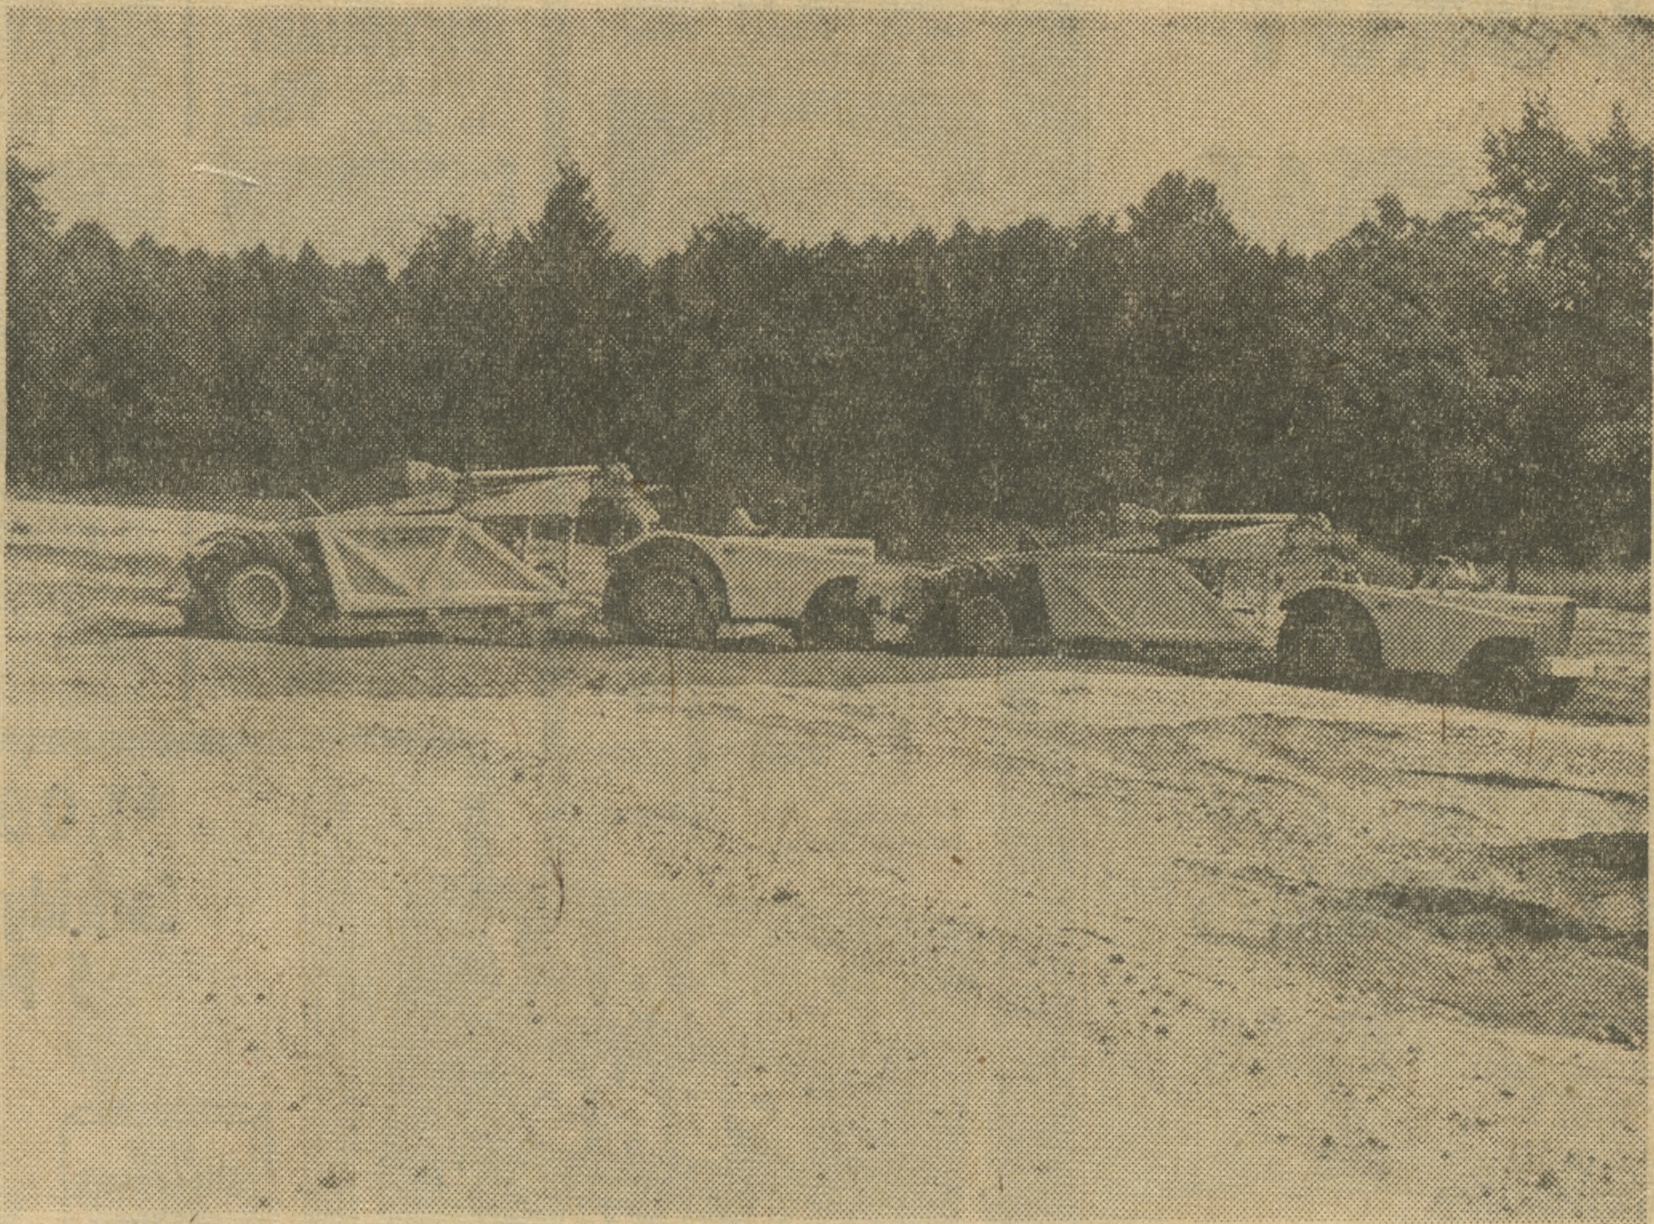

Work began in April and ground moved at a rate of 3,500 yards a day. There are 8,000 yards of dirt needed to build each of the 19 greens and 4,000 yards each for 18 tees. Several hills were cut

the tees and greens will be planted with nine tons of special grass seed.

Greens will have 8,000 square feet to 12,000 square feet of putting surface, making this one of the longest from championship tees of any in Wisconsin. Tees are one-half to one acre in size,

course is 6,200 to 6,300 yards. Average course here will be 6,775 and the championship course 7,135 yards.

A driving range, lighted and of the most modern type, will be open to the public from early April through the golfing season with room for approximately 50

**SPEED DEMONS** — The latest in earth moving machinery speeds the job to scheduled completion about Sept. 20. These two new John Deere self-loading scrapers scrape, pulverize and load 9 yards of earth in 30 seconds, pul-

verize again on the unloading and make a round trip in 1½ to 3 minutes per average haul. Hills are pulled down, swamps filled, tees mounded and one can see the areas shrinking and growing alternately before his eyes.

**A LONG DRIVE** — One of the holes features this long drive between a forest of cedar and tamarack trunks. The woods had been a solid wetland stand with marsh and water areas before the chain saws and giant earth

movers made it part of the golf course. Topsoil has been stacked in convenient piles and soon will be distributed in the necessary places, then bound into place with an estimated nine tons of grass seed.
